

## **Science Speakers**

On the 6<sup>th</sup> of May we were very lucky in Christ the Saviour N.S. to have two scientists and an engineer call to our school to talk to us about what they do.

The two scientists work with Analog Devices in Limerick. They both have completed a PhD in Physics. They were telling us about how science is so important for the job that they are doing now and also how science and engineering are so closely linked.

We were delighted that they came to talk to us today and we learned so much about what they do. As a result of them talking to us there are so many students in our school that would love to become scientists.

Have a look at our reports, powerpoint presentations and photographs from their visit. We also put information about this up on our school website. Here are the scientists, Darren, Sinead and Mike, that came to visit us today.

We were broken up into two groups for the talk. They spoke to  $1^{st}$ ,  $2^{nd}$  and  $3^{rd}$  class first and then spoke to  $4^{th}$ ,  $5^{th}$  and  $6^{th}$  class.

Mike started off our science talk by telling us about the work that they do every day.

Sinead then spoke to us about how she is a scientist and how science plays a very important role in Analog.

Even the teachers got involved by dressing up in the clothing that the sscientists wear.

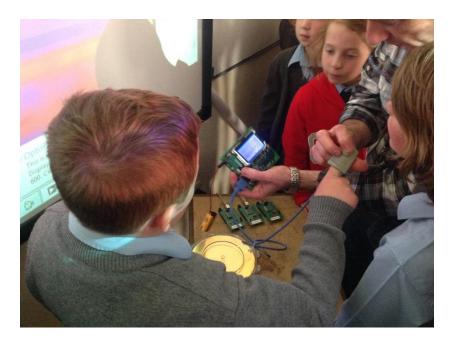

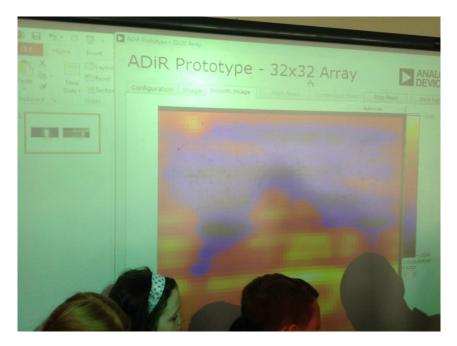

We then got the opportunity to look at and use some of the different science equipment that they brought in with them. This was great fun.

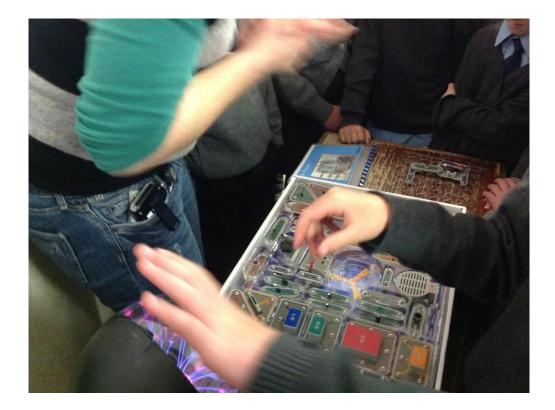

## It was a great day for all involved!!!!
